

VetroKwik™

Glass Brick Installation System

LAYOUT MODULE

INTERLOCKING MODULE

CLEAR POLYCARBONATE MODULES and LAYOUT MODULES ASSEMBLY

VetroKwik™ is a snap together solution for installation of Vetropieno solid glass bricks that utilizes clear polycarbonate and ABS plastic in white or gray.

VetroKwik™ is a no mess installation method that uses precise spacing snap together modules that replace the need for mortar.

The VetroKwik™ Installation System reduces the time to install Vetropieno glass block by approximately 50-75%.

FEATURES & BENEFITS

50-75% Reduction of labor. Reduced material costs.	Available in clear polycarbonate, or ABS white or gray.
Polycarbonate affords increased light transmission.	Utilizes a clean working method.
Dimensional stability	Snap together system of assembly.
Structural adhesives may be used for external applications	Precise spacing
Low maintenance	Structural integrity
No mess installation	Light weight assembly
No special tools required; just a rubber mallet.	Made in USA

VETROKWIK™ was developed as a cost effective Vetropieno® Glass Brick Installation System that makes traditional mortar or silicone methods obsolete. The snap together structure assembles with only a rubber mallet. Labor and materials savings far outweighs the cost of the structural components. The precisely formed vertical spacers are formed to match the tapered shape of Vetropieno™ Solid Glass Brick.

Seves Glass Block Inc. has a sales and technical support team that is ready to help you design, engineer and specify glass block solutions. Please visit our website: www.sevesglassblockinc.com
